Local Water Done Well for Manawatū District

8. The options: Please select your preferred option (select one option only).

Council's Preferred Option

Option 01 Status quo with changes

This option would see Manawatū District Council continuing to manage and deliver the District's water services. This is Council's preferred method.

Option 02 'The Two'

A multi-council Water
Services Council
Controlled Organisation
jointly owned by
Manawatū District Council
and Palmerston North City
Council for the delivery
of water services across
both Councils.

My choice is option 02

Option 03 'The Four'

A Water Services Council
Controlled Organisation
jointly owned by
Horowhenua District Council,
Kāpiti Coast District Council,
Palmerston North City
Council, Manawatū District
Council for the delivery
of water services across
all Councils.

My choice is option 03

9. Please tell us why you selected the above as your preferred option?

I prefer that we leave well enough alone, and not add to MDC's costs. Yes, this district is filling up with retirees from the city, and certainly it is an attractive location, but it also includes superannuitants with their own homes, trying to get by with no financial reserves other than Super. Please don't add projects MOC cannot take on without
Yes, this district is filling up with retirees from the city, and
certainly it is an attractive location, but it also includes superannuitants
with their own homes, trying to get by with no financial reserves
other than Super. Please don't add projects MOC cannot take on without
raising rates!

I am t	families, and seniors with no extra income, would find that burden.
Young	families, and seniors with no extra income, would find that
a real	barden.

Would you like to come to a hearing and speak to Elected Members about your submission? No

How did you hear about this Consultation?

MDC Website

The options:

Option 01: This option would continue to see Manawatū District Council continuing to manage and delivery the District's water services. This is Council's preferred method.

Please tell us why you selected the above as your preferred option.

Our Rates are already high enough, and we have an excellent water system we don't need to be paying for Palmerston North as well.

Please tell us why you did not select the other two options as your preferred option. No one was my choice

Please share any other feedback you have about water service delivery in the future. We don't have any problems with the water.

I wish to request that my name and contact details be withheld from general publication by ticking this box. Please note that if you wish to speak to your submission at the hearing, your name (but not your contact details) will be published within the Council Agenda.

Local Water Done Well Form Submission

There has been a submission of the form Local Water Done Well through your Make you mark Manawatū website.
First and Last Name:
Phone (day):
Mobile:
Email:
Postal Address:
Age Group: 60-79
Are you submitting on behalf of an organisation? No
Are you an MDC trade waste and/or commercial water customer? No
My property has: None of the above
Would you like to come to a hearing and speak to Elected Members about your submission?

The options:

Option 01: This option would continue to see Manawatū District Council continuing to manage and delivery the District's water services. This is Council's preferred method.

Please tell us why you selected the above as your preferred option.

Our rates have paid for our resources for years in this council. We also have invested a lot of time, effort and finance into our own household supply with water tanks and septic lines.

Please tell us why you did not select the other two options as your preferred option.

We do not want to share resources with other councils. It is up to them and their own ratepayers to pay for their own resources.

I wish to request that my name and contact details be withheld from general publication by ticking this box. Please note that if you wish to speak to your submission at the hearing, your name (but not your contact details) will be published within the Council Agenda.

Yes

Are you submitting on behalf of an organisation?			
No			
My property has:			
Drinking water connected to MDC			
Wastewater connected to MDC			

Would you like to come to a hearing and speak to Elected Members about your submission?

No

How did you hear about this Consultation?

Social Media

The options:

Option 01: This option would continue to see Manawatū District Council continuing to manage and delivery the District's water services. This is Council's preferred method.

Please tell us why you selected the above as your preferred option.

Manawatu District Council has over the past years made sure our District has very good water and waste water systems in place. Also for the future

Please tell us why you did not select the other two options as your preferred option.

Because our District Council has done more than other councils in the greater area to provide for our Water and waste water needs. Don't want to have to pay extra to help fund the nearby councils Water & waste water.

Please share any other feedback you have about water service delivery in the future.

My only comment is I wish the Feilding water supply did not cause limescale deposits on areas in the home such as Showers and toilets

I wish to request that my name and contact details be withheld from general publication by ticking this box. Please note that if you wish to speak to your submission at the hearing, your name (but not your contact details) will be published within the Council Agenda.

Are you submitting on behalf of an organisation?
No
Are you an MDC trade waste and/or commercial water customer?
No
My property has:
Drinking water connected to MDC
Wastewater connected to MDC
Would you like to come to a hearing and speak to Elected Members about your
submission?
No

How did you hear about this Consultation?

Social Media

The options:

Option 01: This option would continue to see Manawatū District Council continuing to manage and delivery the District's water services. This is Council's preferred method.

Please tell us why you selected the above as your preferred option.

I believe that our council understands our water systems better and knowing what our community needs.

Please tell us why you did not select the other two options as your preferred option. Same as above but also the cost factor comes into it also. The other options are going to put huge costs back onto us.

I wish to request that my name and contact details be withheld from general publication by ticking this box. Please note that if you wish to speak to your submission at the hearing, your name (but not your contact details) will be published within the Council Agenda.

Please tell us why you selected the above as your preferred option.

I believe that too much of the Manawatu District Council's rate payer money will get absorbed into the Palmerston North area if we were to combine with water services. We have invested heavily over many years to have our district water services upgraded and adequate for our needs now and into the future.

We would become the poor cousin if combined with any other area !!

Please share any other feedback you have about water service delivery in the future.

Keep moving forward drawing in our out lining areas that are part of the MDC's control, Rongotea, Sanson, Kimbolton etc, etc to improve their water services/supplies

The options:

Option 01: This option would continue to see Manawatū District Council continuing to manage and delivery the District's water services. This is Council's preferred method.

Please tell us why you selected the above as your preferred option.

MDC has managed the water services infrastructure very well over a long period & has prudently used rates money wisely to ensure we have good quality water & don't have the restrictions that a lot of councils around the country have to endure.

Please tell us why you did not select the other two options as your preferred option.

Aligning ourselves with Councils that have failed to deliver for their own regions is not in the best interest of our community - the MDC ratepayer should not be culpable for the negligence of other Councils to fulfil their own communities services.

I wish to request that my name and contact details be withheld from general publication by ticking this box. Please note that if you wish to speak to your submission at the hearing, your name (but not your contact details) will be published within the Council Agenda.

Option 01: This option would continue to see Manawatū District Council continuing to manage and delivery the District's water services. This is Council's preferred method.

Please tell us why you selected the above as your preferred option.

I have picked Option one as I feel Manawatu District Council is doing a great job managing our water . They know what is needed for our district. And are managing Feildings Water Services well.

Please tell us why you did not select the other two options as your preferred option. I didn't pick the other two options as Manawatu District Council are doing a great job with our waters and to join with other Councils means they will also have to take on other councils water issues if they are not up date. Also the cost of setting up an Independent board, which there is a cost to this which we as a rate payer would have to pay for .

I wish to request that my name and contact details be withheld from general publication by ticking this box. Please note that if you wish to speak to your submission at the hearing, your name (but not your contact details) will be published within the Council Agenda.

Social Media

The options:

Option 01: This option would continue to see Manawatū District Council continuing to manage and delivery the District's water services. This is Council's preferred method.

Please tell us why you selected the above as your preferred option.

MDC have made investments into the water services, especially after the infrastructure was compromised after the floods in 2004. In light of this the rates in Feilding are significantly higher, but we are happy to pay extra because they currently do a good job.

Please tell us why you did not select the other two options as your preferred option. Combining with other regions or PNCC could alter the management and debt. Best to stay local.

Local Water Done Well Form Submission

There has been a submission of the form Local Water Done Well through your Make y mark Manawatū website.
First and Last Name:
Mobile:
Email:
Postal Address:
Age Group: 60-79
Are you submitting on behalf of an organisation?
Are you an MDC trade waste and/or commercial water customer?
Would you like to come to a hearing and speak to Elected Members about your submission? No
How did you hear about this Consultation? Other
The options:

Option 01: This option would continue to see Manawatū District Council continuing to manage and delivery the District's water services. This is Council's preferred method. Please tell us why you selected the above as your preferred option.

I think MDC do okay in this area

Please tell us why you did not select the other two options as your preferred option. I think it would cost more if other councils were involved.

I wish to request that my name and contact details be withheld from general publication by ticking this box. Please note that if you wish to speak to your submission at the hearing, your name (but not your contact details) will be published within the Council Agenda.

The options:

Option 01: This option would continue to see Manawatū District Council continuing to manage and delivery the District's water services. This is Council's preferred method.

Please tell us why you selected the above as your preferred option.

I have work for PNCC as a water treatment operator. And I know first hand how bad the Infrastruction is.

I believe MDC would be better off Continuing with other council.

Please tell us why you did not select the other two options as your preferred option.

The other councils around the region infrastructure is not in a good state.

Please share any other feedback you have about water service delivery in the future.

I like the way MDC is open. With their Shareholders holders in rate payers.

Thank you.

The options:

Option 01: This option would continue to see Manawatū District Council continuing to manage and delivery the District's water services. This is Council's preferred method.

Please tell us why you selected the above as your preferred option.

I think it makes complete sense for MDC to continue to manage and deliver the districts water services. I don't want to pay or want others to pay higher rates to support the other district councils (selfish but sometimes we have to be to look after our own) especially when other options don't necessarily have the same end result. I also appreciate local waters being managed by locals, we need to and should maintain mana. Much more beneficial for all I believe.

Please tell us why you did not select the other two options as your preferred option. There are no benefits for MDC.

Please share any other feedback you have about water service delivery in the future. I think further discussions need to occur regarding other schemes eg rural water as this is a huge issue and has been a huge issue for years for my hapū and whanau. It sounds like there are potentially further legislations yet to come from select committee about this and it would be interesting to know how this new legislation effects current issues/schemes being discussed re CCO.

I wish to request that my name and contact details be withheld from general publication by ticking this box. Please note that if you wish to speak to your submission at the hearing, your name (but not your contact details) will be published within the Council Agenda.

MDC Website

The options:

Option 01: This option would continue to see Manawatū District Council continuing to manage and delivery the District's water services. This is Council's preferred method.

Please tell us why you selected the above as your preferred option.

This option looks as though it will keep the rates for MDC rate payers at a lower level plus MDC seems to be doing very well of its own accord at caring for the water supply and the environment

Please tell us why you did not select the other two options as your preferred option.

MDC prefers option 1 and the other options involve other councils which suggests rates would probably increase for MDC rate payers. It is hard to imagine how water control councils would be able to cover all districts involved equally and fairly.

I wish to request that my name and contact details be withheld from general publication by ticking this box. Please note that if you wish to speak to your submission at the hearing, your name (but not your contact details) will be published within the Council Agenda.

Newspaper

Other

The options:

Option 01: This option would continue to see Manawatū District Council continuing to manage and delivery the District's water services. This is Council's preferred method.

Please tell us why you selected the above as your preferred option.

I consider that the Manawatu District Council has been actively developing and expanding the water services to mitigate deficiencies in the current water services and enhances services to meet increases in demand and revised standards.

Further I recall that many other local authorities have failed to maintain their water services to the same standard as the Manawatu District Council and now will have to play more catch up to get required level of wter services delivery.

Why should Manawatu District Council residents and ratepayers be expected and required to subsidise water services in other local authority areas.

Please tell us why you did not select the other two options as your preferred option. Why should Manawatu District Council residents and ratepayers be expected and required to subsidise water services in other local authority areas.

Options two and three will put Manawatu District Council residents and ratepayers in a combined jointly owned organisations which will result in cross subsidisation between water consumers from effective and ineffectively managed services.

Please share any other feedback you have about water service delivery in the future. Where water service delivery meets valid revised supply standards the supply should continue to be provided as now.

I wish to request that my name and contact details be withheld from general publication by ticking this box. Please note that if you wish to speak to your submission at the hearing, your name (but not your contact details) will be published within the Council Agenda.

Would you like to come to a hearing and speak to Elected Members about your submission?

No

Other

The options:

Option 01: This option would continue to see Manawatū District Council continuing to manage and delivery the District's water services. This is Council's preferred method.

Please tell us why you selected the above as your preferred option.

MDC has made steady improvements over time (paid for by council taxes) to our water services. I trust the council to continue to make appropriate decisions and investments in water services - putting the needs of local people first, which is not something I think will happen if we are amalgamated for water services with larger populations e.g. Palmerston North and Horowhenua. Residents of Manawatū District have paid for improvements in water services (amongst other improvements to our district) through higher rates over decades and I do not wish to pay again to subsidise the need for improvements to water services in other districts.

Please tell us why you did not select the other two options as your preferred option.

As a long-standing resident of Manawatū, I think I have already paid for necessary improvements to our district water services through higher than national average rates and I do not wish to pay again to subsidise improvements in other districts. I also do not think the water service needs of residents of Manawatū District will be put first if we are amalgamated with other larger populations e.g. Palmerston North City and Horowhenua.

Please share any other feedback you have about water service delivery in the future.

Our district (especially Feilding residential areas) is rapidly growing and I think it is vital that our storm water, sewerage and water treatment facilities continue to improve to meet growing demand. I also think the cost of this should be factored into the planning process for developers of new subdivisions - existing residents should not have to pay more to update facilities due to planned growth of the town.

Option 01: This option would continue to see Manawatū District Council continuing to manage and delivery the District's water services. This is Council's preferred method.

Please tell us why you selected the above as your preferred option.

Keep it how it is. MDC does a good job of looking after there residents and provides good resources to the town and farming areas. Increasing rates due to a merge is the last thing people need. If mdc are in favour of this option then I am in favour of it.

Please tell us why you did not select the other two options as your preferred option.

We have moved from Palmerston North district council and we're far from impressed in how they manage funds/rates. Despite not currently requiring water services I would not like mdc to have to collaborate this closely with palmy.

I wish to request that my name and contact details be withheld from general publication by ticking this box. Please note that if you wish to speak to your submission at the hearing, your name (but not your contact details) will be published within the Council Agenda.

MDC Website

The options:

Option 01: This option would continue to see Manawatū District Council continuing to manage and delivery the District's water services. This is Council's preferred method.

Please tell us why you selected the above as your preferred option.

MDC has historical done well managing and maintaining their water assets. It also means we maintain ownership of the assets we can be proud of.

Please tell us why you did not select the other two options as your preferred option. I didn't see why MDC should have to help clean up the state of other councils infrastructure when they have spent the time and effort maintaining their own.

I wish to request that my name and contact details be withheld from general publication by ticking this box. Please note that if you wish to speak to your submission at the hearing, your name (but not your contact details) will be published within the Council Agenda.

Word of Mouth

The options:

Option 01: This option would continue to see Manawatū District Council continuing to manage and delivery the District's water services. This is Council's preferred method.

Please tell us why you selected the above as your preferred option.

Our Council has been forward thinking in providing Manawatu District ratepayers with a good water system and a good future plan.

Please tell us why you did not select the other two options as your preferred option. Why should Manawatu ratepayers pay for other areas poor water management.

I wish to request that my name and contact details be withheld from general publication by ticking this box. Please note that if you wish to speak to your submission at the hearing, your name (but not your contact details) will be published within the Council Agenda.

Submission to Manawatū District Council (MDC)

From

Manawatū Business Chamber (MBC) Local Water Done Well

April 4th, 2025

Mobile: 021 0533071 Email: <u>amanda@manawatuchamber.co.nz</u>

Contacts: Amanda Linsley, CEO, Manawatū Business Chamber

Rahui Corbett, Chairperson, Manawatū Business Chamber

Manawatū Business Chamber Board Members: Ed Teece, Paul O'Brien, Blair Alabaster, Rachael Rakatau, Alex Boustridge, Angus Duncan, Hamish O'Brien, Nikki Maw, David Lanham.

The Manawatū Business Chamber ("MBC") is a 468+ Business Member organisation that represents a sizeable proportion of the region's GDP and employment. We are funded by our members. The MBC advocates for business and promotes business growth that supports economic growth. MBC provide business services and networking opportunities.

This submission is presented to Council by the MBC Board

Local Water Done Well - MBC would like to thank MDC for the opportunity to make a submission to this consultation, below please find our feedback.

- **1.** MBC support MDC's Preferred Option 1 we understand following extensive modelling (Morrison Low Report) that option 1 is financially the best option for the MDC ratepayers compared to the other options.
- 2. The financial benefit of Option 1 to Manawatū District ratepayers is significant and we understand is the primary reason that this is Council's preferred option. We note that the Morrison Low's approach focussed on the impact of residential consumers, expressing the impact through an average household cost. With a CCO we understand that there would also be an impact for commercial ratepayers.
- **3**. MBC also understand that government levies and regulatory requirements are being applied by the Commerce Commission and the Water Services Authority, this is estimated to be \$187,000 per year charged to Manawatū District and will apply to all options.
- **4.** MBC acknowledge that should Option 2 or 3 be chosen the outcome will also depend on whatever the other Councils decide and what is best for *their* communities which may not align with those of MDC. Council and therefore ipso facto ratepayers will have less of a say in the running and regulation of their water services.

5. MBC are aware that the preferred options for the other councils are as follows:

PNCC, The Four (4)

K`āpiti, Inhouse, standalone – the status quo

Horowhenua Jointly owned by themselves, PNCC, Kāpiti and Manawatū DC

This aligns with PNCC

6. MBC is a regional Chamber and emphasises that this submission to MDC is looking at the best option for Manawatū District which may not align with other councils within our region to whom we are also making submissions. In the longer term it may be preferable to align with other councils for scalability, financial and generational cost reasons and/or when further investment is needed into the future through regulatory or other reason that is currently an unknown.

In summary:

MBC thank MDC for the opportunity to submit on this important and complex decision with regards to the future of water for the Manawatū District. We support Option 1 as the best solution for the district across the length of the modelling.

We do not wish to speak to this submission on this occasion.

Signed on behalf of The Board of the Manawatū Business Chamber

A J Linsley - CEO

My choice is option 03

9. Please tell us why you selected the above as your preferred option?

We have chosen Option of because we believe that joining with other large councils will disadventage the amount of funds we have to spend on our own needs which Seem to be growing more and more as towns expand. The money we pay is in good South that the council does what it has been paid for. Living in a country village for 50+ years we have been able to have a comfortable but not extravagant life style. All these extra beautiful extravagant things need to be put in check and the amenities people need to live well given the priority. Living within your means. Water is an essential and the money that we have all contributed for this purpose needs to be used efficiently as possible with that in mind we believe that all homes who can need to have a tank outside to collect rain water to supplement the town water especially in times of drought. Farm people in this country know this reality and there is no cost to rain from the sky Submission form - Page 2

MDC Website

Word of Mouth

The options:

Option 01: This option would continue to see Manawatū District Council continuing to manage and delivery the District's water services. This is Council's preferred method.

Please tell us why you selected the above as your preferred option.

I support Option 1 (status quo with changes) as the best available option — but I do so reluctantly.

I believe in collaborative, regional approaches to water infrastructure. In principle, a well-designed CCO model could unlock benefits through shared expertise, scale, and investment. But neither Option 2 nor Option 3 makes a convincing case that this would happen.

Option 1 is the only model where Manawatū ratepayers are not financially disadvantaged. The modelling clearly shows lower household water charges over the 30-year period. It also preserves local control, which enables more responsive governance, tailored investment decisions, and stronger accountability to communities and mana whenua.

That said, Option 1 is not perfect. It lacks any social or cultural impact analysis — and no clear articulation of how local democratic governance or Treaty obligations will be strengthened under this model.

We must ensure that "status quo" doesn't mean stagnation. If local control is retained, it should be used to raise the bar on transparency, iwi partnership, and public trust.

Please tell us why you did not select the other two options as your preferred option. Both Option 2 ("The Two") and Option 3 ("The Four") suffer from serious weaknesses in their current form:

They result in significantly higher costs for Manawatū ratepayers — hundreds of dollars more per year — primarily due to cross-subsidisation of other councils' capital needs.

The financial modelling does not adequately reflect IT costs, which scale with complexity rather than population. Multi-council integration is expensive, and this is understated.

There is no robust governance design presented — including how local voices will be protected, how iwi engagement will be ensured, or how strategic direction will be democratically guided.

If we must move to a CCO model, I would prefer Option 3 with harmonised charges across all councils. That would provide a fairer distribution of costs and broader representation — but only if supported by a transparent governance and engagement framework, which is currently lacking.

Please share any other feedback you have about water service delivery in the future. I strongly encourage Council to advocate for a higher standard of transparency and

modelling in future consultations.

The financial analysis must be paired with sensitivity testing, social and cultural impact assessments, and a clearer description of how governance structures will function in practice. In particular, I would like to see:

How stranded overheads will be managed under a CCO

How innovation, environmental outcomes, and service quality will be benchmarked across models

How local and iwi voices will remain empowered in any future structure

How different models would perform under future regulatory change scenarios

While I have selected Option 1, I am concerned that none of the models, including the status quo, account for regulatory risk. If national water quality or environmental standards rise significantly, the cost of compliance could grow sharply — potentially making upgrades unaffordable for smaller councils like MDC. That would undermine the financial case for Option 1 and pose serious service delivery risks. These kinds of "what if" scenarios should be stress-tested across all options before long-term commitments are made.

Water service delivery is not just an infrastructure issue — it is a democratic, cultural, and environmental one. I appreciate the work Council has done to evaluate the options, but I urge that future reform be driven not only by efficiency but by a clear commitment to resilience, partnership, and public accountability.

Age Group: 60-79
Are you submitting on behalf of an organisation?
Are you an MDC trade waste and/or commercial water customer?
My property has: None of the above
Would you like to come to a hearing and speak to Elected Members about your submission?

How did you hear about this Consultation?

Social Media MDC Website Newspaper

The options:

Option 01: This option would continue to see Manawatū District Council continuing to manage and delivery the District's water services. This is Council's preferred method.

Please tell us why you selected the above as your preferred option.

It has the best long term financial outcomes for MDC rate payers, and keeps our water services 'in house'

Please tell us why you did not select the other two options as your preferred option.

They relinquish local control of our water system and our council are less 'hands on' in decision making.

Please share any other feedback you have about water service delivery in the future. I sincerely hope rural households who are not connected to any MDC water system are not going to be u charged rates to help the urban population with any scheme. We provide and maintain our own water system.

I wish to request that my name and contact details be withheld from general publication by ticking this box. Please note that if you wish to speak to your submission at the hearing, your name (but not your contact details) will be published within the Council Agenda.

Yes

Please tell us why you selected the above as your preferred option.

I am very happy with the way MDC manages our water. They have invested a lot of money and time into future proofing (fantastic foresight) I have no wish to change this in anyway.

Please tell us why you did not select the other two options as your preferred option. MDC are doing a wonderful job with managing our water, we have no wish to change this.

Please share any other feedback you have about water service delivery in the future. Keep continuing to do a wonderful job managing this asset

Word of Mouth

The options:

Option 01: This option would continue to see Manawatū District Council continuing to manage and delivery the District's water services. This is Council's preferred method.

Please tell us why you selected the above as your preferred option.

The Capital investment made by MDC ratepayers over a significant period of needs to be protected and not diluted. It is important to recognise that non MDC ratepayers throughout the Region deliberately failed to implement programmes that would manage and monitor there aged water delivery infrastructure.

Please tell us why you did not select the other two options as your preferred option. Poor management of current District water delivery systems.

Newspaper

The options:

Option 03: A multi-council Water Services Council Controlled Organisation jointly owned by Horowhenua District Council, Palmerston North City Council, Manawatū District Council for the delivery of water services across all Councils.

Please tell us why you selected the above as your preferred option.

Feilding and rural ratepayers have established a sound water asset through targeted rates over the past 25 years. The rates applying to the provision of water services in Manawatu district need to be ring fenced and clearly reported to ratepayers as being used for water related delivery purposes only.

Please tell us why you did not select the other two options as your preferred option. Manawatu district ratepayers have been charged for the establishment and running of a sound water delivery service over many years. We need to retain control of this delivery within our own district along with appropriate local council accountability to ratepayers.

Please share any other feedback you have about water service delivery in the future. Feilding urban stormwater street gutters need to be maintained properly, ie cleared of dead leaves and rubbish on a regular basis rather than just spraying and leaving the residue to build up. Stormwater inlets also require regular clearance of obstruction. Lack of maintenance creates regular localised flooding. This causes regular problems even after moderate rainfall. This can be prevented quite simply with regular manual shovel clearance of street gutters from the contractor involved in street maintenance. Simple really.

Please tell us why you selected the above as your preferred option.

Locally controlled by local people.

Halcombe is soon to be added to the MDC waste water system.

Please tell us why you did not select the other two options as your preferred option.

We do not want to subsidise other councils for not having invested in their water systems before now.

Please share any other feedback you have about water service delivery in the future.

Perhaps this could be looked at again once all council operated water systems are on an equal footing.

Option 01: This option would continue to see Manawatū District Council continuing to manage and delivery the District's water services. This is Council's preferred method.

Please tell us why you selected the above as your preferred option.

Would prefer a locally operated water service

Please tell us why you did not select the other two options as your preferred option.

Did not think it fair on Manawatu rate payers to subsidise other council operated water services that need significant investment to bring them up to scratch. Our council have had the forethought to invest in the water services over the years.

Please share any other feedback you have about water service delivery in the future.

Once all council operated water services are on an equal footing, then perhaps this idea could be revisited

The options:

Option 01: This option would continue to see Manawatū District Council continuing to manage and delivery the District's water services. This is Council's preferred method.

Please tell us why you selected the above as your preferred option.

This option better solidifies our current operating model. The risk is that if you join with other councils, we would be looking at bigger rates increases, in order to pay for the CCO.

It is likely that the delivery of services may be spread thinner than it is.

Therefore the first option is preferable.

Please tell us why you did not select the other two options as your preferred option.

Newspaper

Social Media

Word of Mouth

The options:

Option 03: A multi-council Water Services Council Controlled Organisation jointly owned by Horowhenua District Council, Palmerston North City Council, Manawatū District Council for the delivery of water services across all Councils.

Please tell us why you selected the above as your preferred option.

The daily decision of the organization would be fully independent of Council.

Day to day running of the work schedule would be decided by the Water Services Council Controlled Organization.

I believe this would have a more positive outcome overall, for the rate payers and our environment .

Please tell us why you did not select the other two options as your preferred option.

In the past recent years There have been decisions made by MDC which have not been transparent .

And known contamination of the Oroua River in the past was abhorrently ignored by the Council; little or no documentation of the contamination recorded. and no action was taken for several years.

Therefore, I believe it would be wise to remove decision making from the Council, so a balance of voices between the other partnering councils and stakeholders would provide greater transparency, overall wiser decision making.

Word of Mouth

The options:

Option 01: This option would continue to see Manawatū District Council continuing to manage and delivery the District's water services. This is Council's preferred method.

Please tell us why you selected the above as your preferred option.

MDC ratepayers have over the years paid for a well managed and resourced water management system which has meant that we already pay significantly higher rates than other ratepayers from other local councils around us. Manawatu District Council have had the foresight to plan and manage the three water activities for our council region to a high standard.

Amalgamating with other councils would mean we are now expected to pay again in our rates for less well managed water schemes in areas we do not even live. MDC knows what is needed in our own council region as our elected councillors live here and have a vested interest in the region and its people.

Please tell us why you did not select the other two options as your preferred option. as above

MDC Website

The options:

Option 01: This option would continue to see Manawatū District Council continuing to manage and delivery the District's water services. This is Council's preferred method.

Please tell us why you selected the above as your preferred option.

As a ratepayer I feel I, along with others in the Manawatū District have invested in the water management system that has delivered exceptionally well. We are very high rate payers compared to other districts so I expect to have a premium water supply.

Please tell us why you did not select the other two options as your preferred option.

I am concerned that other councils like Palmerston North, Horowhenua/Kapiti may not be managing their water resources as well as MDC and have not invested enough in their own water systems. Options 2 and 3 may see MDC residents having to bear the burden of big city users.

Please share any other feedback you have about water service delivery in the future. Whatever MDC are doing for our water services, well done.

Local Water Done Well Form Submission

There has been a submission of the form Local Water Done Well through your Make your mark Manawatū website.

First and Last Name:

Keith Wiggins

Phone (day):

063233983

Mobile:

0275187323

Email:

winggsta@gmail.com

Postal Address:

5 tui mill grove

Feilding 4702

Age Group:

60-79

Are you submitting on behalf of an organisation?

No

My property has:

Drinking water connected to MDC

Wastewater connected to MDC

Would you like to come to a hearing and speak to Elected Members about your submission?

No

How did you hear about this Consultation?

Social Media

The options:

Option 01: This option would continue to see Manawatū District Council continuing to manage and delivery the District's water services. This is Council's preferred method.

Please tell us why you selected the above as your preferred option.

Because MDC have priotised it spending on up grading their water services, where as the the other councils haven't,

Please tell us why you did not select the other two options as your preferred option. Because we have our water services in order

Please share any other feedback you have about water service delivery in the future. Because we have our water services in order

Are you submitting on behalf of an organisation? No
Are you an MDC trade waste and/or commercial water customer? No
My property has: None of the above
Would you like to come to a hearing and speak to Elected Members about your submission? No
How did you hear about this Consultation? Social Media
The options:

Option 01: This option would continue to see Manawatū District Council continuing to manage and delivery the District's water services. This is Council's preferred method.

Please tell us why you selected the above as your preferred option.

The best of the 3 options. I do not want any of these options.

The drinking quality of the Feilding water needs alot if work. Spend your time and money there before you look at rural people that look after their own water.

Please tell us why you did not select the other two options as your preferred option.

Palmerston North water has serious issues and it must not become our problem. They need to prioritize their funding to better serve their community

Please share any other feedback you have about water service delivery in the future. Stay away from our rural water. We manage it fine without big brother.

I wish to request that my name and contact details be withheld from general publication by ticking this box. Please note that if you wish to speak to your submission at the hearing, your name (but not your contact details) will be published within the Council Agenda.

Yes

Would you like to come to a hearing and speak to Elected Members about your submission?

No

How did you hear about this Consultation?

Social Media

The options:

Option 01: This option would continue to see Manawatū District Council continuing to manage and delivery the District's water services. This is Council's preferred method.

Please tell us why you selected the above as your preferred option.

I prefer having local council and local people controlling supply of something as vital as water, as they're more able to work on behalf of our local interests and understand and advocate for our community.

Please tell us why you did not select the other two options as your preferred option.

I don't like the idea of having to potentially cater to the needs and interests of other councils, and be paying for their infrastructure too from our already-high rates.

Please share any other feedback you have about water service delivery in the future.

Please get the fluoride out of our water.

I wish to request that my name and contact details be withheld from general publication by ticking this box. Please note that if you wish to speak to your submission at the hearing, your name (but not your contact details) will be published within the Council Agenda.

8. The options: Please select your preferred option (select one option only).

This option would see Manawatū District Council continuing to manage and deliver the District's water services. This is Council's preferred method.

My choice is option 01

Option 02 'The Two'

A multi-council Water
Services Council
Controlled Organisation
jointly owned by
Manawatū District Council
and Palmerston North City
Council for the delivery
of water services across
both Councils.

My choice is option 02

ocal

Option 03 'The Four'

A Water Services Council
Controlled Organisation
jointly owned by
Horowhenua District Council,
Kāpiti Coast District Council,
Palmerston North City
Council, Manawatū District
Council for the delivery
of water services across
all Councils.

My choice is option 03
