8. The options: Please select your preferred option (select one option only).

This option would see Manawatū District Council continuing to manage and deliver the District's water services. This is Council's preferred method.

My choice is option 01

Option 02 'The Two'

A multi-council Water
Services Council
Controlled Organisation
jointly owned by
Manawatū District Council
and Palmerston North City
Council for the delivery
of water services across
both Councils.

My choice is option 02

Option 03 'The Four'

A Water Services Council
Controlled Organisation
jointly owned by
Horowhenua District Council,
Kāpiti Coast District Council,
Palmerston North City
Council, Manawatū District
Council for the delivery
of water services across
all Councils.

My choice is option 03

9. Please tell us why you selected the above as your preferred option?

into improving nater quality, consistency of supply and flood control.

For these reasons I believe Moc needs to continue to have control of the water supply in our district so they are directly responsible to rate payers and businesses in our district.

This was why I never agreed with the 3 Waters Proposal which meand we could become liable for Othe Courais mismanagement of their water supplies.

Kelp our supply and the corticl of it local!

9. Please tell us why you selected the above as your preferred option?

Due to proactive planing and implimentation MDC sits in a strong and unique position.
- Keep MDC budgets and expenditure within the MDC area.
- Because of our strong infrastructure position due to careful forethought and expenditure we would be lost within a multi-council organisation and our more monies shoulded out of our area. to upgrade councils that have lacked infrastructure planing over decades,

How did you hear about this Consultation?

Word of Mouth

The options:

Option 01: This option would continue to see Manawatū District Council continuing to manage and delivery the District's water services. This is Council's preferred method.

Please tell us why you selected the above as your preferred option.

Although I am not a user of water services as my rural property is not connected I still would like to see whanau & the wider community retain the current system as it is in their best interests to retain locally owned assets; retain connections to council 'known faces'.

Theother

Please tell us why you did not select the other two options as your preferred option.

The proposed alternative corporate models will not I believe reflect who this community is or understand its uniqueness, in a climate of financial global unrest and historically nationally unsound corporatization of community & state owned assets, MDC needs to hold tight & continue on an already well established pathway.

Please share any other feedback you have about water service delivery in the future.

Rural water needs, in Te Reureu this needs to be fair & equitable system for both Māori land owners & residents going forward regardless of what central government may propose we need access to water.

The options:

Option 01: This option would continue to see Manawatū District Council continuing to manage and delivery the District's water services. This is Council's preferred method.

Please tell us why you selected the above as your preferred option.

Feilding has a wonderful setup well designed operating water system. We don't want to be associated with dysfunctional PALMERSTON NORTH COUNCIL. It would no doubt put our rates up even higher than they are already.

Please share any other feedback you have about water service delivery in the future. No want and don't need water meters.

I wish to request that my name and contact details be withheld from general publication by ticking this box. Please note that if you wish to speak to your submission at the hearing, your name (but not your contact details) will be published within the Council Agenda.

The options:

Option 01: This option would continue to see Manawatū District Council continuing to manage and delivery the District's water services. This is Council's preferred method.

Please tell us why you selected the above as your preferred option.

As a farmer we are fully self contained with both our drinking water & our waste water. Feilding's water does not have a terrible taste like the water in some other regions--so why change systems that are obviously working well!

Please tell us why you did not select the other two options as your preferred option. MDC have done a great job so far without input from other regions.

The options:

Option 02: A multi-council Water Services Council Controlled Organisation jointly owned by Manawatū District Council and Palmerston North City Council for the delivery of water services across both Councils

Please tell us why you selected the above as your preferred option.

It might be more beneficial for Better infrastructure and Better run future infrastructure projects around water. If there are more people involved who can pay higher rates than what our council rates would be, just a thought, could be wrong, but more hands make lighter work

Please tell us why you did not select the other two options as your preferred option.

I think perhaps with just being MDC that we might have reached our capacity for infrastructure and future proofing but you don't want to go too big and have too many big councils with the hand in the pot because the smaller run areas miss out so for me, it's the medium size option But still keeping it local

Please share any other feedback you have about water service delivery in the future. I think my concern is that the smaller Rural communities will be put on the back burner because bigger more populated communities will need to be surface first and the smaller areas with less populations will be Service last and the quality will drop

I wish to request that my name and contact details be withheld from general publication by ticking this box. Please note that if you wish to speak to your submission at the hearing, your name (but not your contact details) will be published within the Council Agenda.

Would you like to come to a hearing and speak to Elected Members about your submission?

Other

The options:

Option 01: This option would continue to see Manawatū District Council continuing to manage and delivery the District's water services. This is Council's preferred method.

Please tell us why you selected the above as your preferred option.

I have chosen Option 1 for the following reasons:

- 1. Empowering Local Decision-Making: Option 1 ensures that decisions affecting the Manawatū District are made by the residents and ratepayers who understand our unique needs and priorities. This local approach safeguards the ability of our community to shape policies that best suit us, rather than having outside entities dictate our future.
- 2. Preventing financial Inequity: By choosing Option 1, our rates will be directly invested into maintaining and improving local infrastructure. It prevents the unfair redistribution of our contributions to support other councils that have failed to address or invest in their own water quality challenges. This ensures accountability and fairness for ratepayers within our district.
- 3. Preserving Community Voice: Joining with other councils risks diluting the voice of our Manawatu community. Under Option 1, we retain a strong, independent platform to advocate for the specific needs of our residents and rural areas. This autonomy is essential in ensuring that our concerns are heard and addressed effectively.
- 4. Protecting Rural Interests: Option 1 respects the unique challenges faced by rural communities, such as the costs of maintaining tank water and septic systems. It avoids burdening rural ratepayers with additional expenses to subsidize services for urban areas, where residents already pay for their own infrastructure. This option promotes fairness and transparency in addressing rural needs.
- 5. Transparency in Costs: The council has yet to provide clarity on the potential hidden costs that could arise for rural communities under alternative options. Option 1 minimises the risk of unexpected financial obligations, ensuring that rural ratepayers are not unfairly impacted by ambiguous or poorly communicated policies.

Please tell us why you did not select the other two options as your preferred option. I did not support the other two options as they are both likely to incur higher costs and diminish the capacity of our local community to effectively voice its priorities concerning water management.

We believe that the government's proposal may be tied to a broader agenda that promotes the amalgamation of councils and a shift towards shared services. This approach could significantly reduce local involvement in decision-making while placing the financial burden on residents. A relevant example is the rising rates imposed by the Horizons Regional Council, accompanied by a dramatic increase in staffing levels. Despite these changes, it remains unclear what additional benefits local ratepayers within the Manawatū District are receiving from these services.

Please share any other feedback you have about water service delivery in the future.

It has been disappointing to learn, through this consultation process, that rural ratepayers will face an increased financial burden for maintaining their individual water supplies due to government legislation aimed at improving water quality in rural areas. This legislation imposes a significant cost on individual property owners, potentially requiring them to invest thousands of dollars to safeguard their water—an expense they must bear alone, on top of existing rates.

Councils should have been upfront about these implications and ensured that this information was presented to all ratepayers and residents in the Manawatū District as part of the consultation process. Should Option 1 be agreed upon, rural ratepayers will not accept any additional rates increases to cover town water supply, sewage, or stormwater maintenance.

A clear example of the council's shortcomings is the public stormwater drain on Makino Road. Despite being a council-owned asset, it is poorly maintained, with multiple failures along the road. Instead of addressing these issues, the council appears to rely on developers to resolve problems that should have been properly managed from the outset. This reflects a broader pattern of sidelining essential maintenance and delaying critical infrastructure work in favour of non-essential projects or developments.

The options:

Option 01: This option would continue to see Manawatū District Council continuing to manage and delivery the District's water services. This is Council's preferred method.

Please tell us why you selected the above as your preferred option.

MDC have invested wisely in our infrastructure and are leading the way. Others around us have not. This is the time to be sharing the good news with our community on how our investment choices have prevailed. Allowing others who did not make wise investments to ride on the coat tails seems detrimental to MDC

Please tell us why you did not select the other two options as your preferred option. I am not in favour of shared services with PNCC. Different demographics, different services, values.

I think the best thing for the people and services of Manawatū is to continue as we are. Our water and waste services are really reliable and of a high quality.

The options:

Option 01: This option would continue to see Manawatū District Council continuing to manage and delivery the District's water services. This is Council's preferred method.

Please tell us why you selected the above as your preferred option.

MDC has over recent years been proactive in upgrading and new works for drinking water, wastewater and storm water. This at considerable expense funded partially by a not insignificant rates levy for those connected. The community is heavily invested in the status quo system, and to relinquish it would be a disservice to the community, who have been paying for the systems MDC have established.

Please tell us why you did not select the other two options as your preferred option.

Both these two options would but MDC residents at a financial disadvantage as MDCs water systems are in substantially better condition/standard to either PNCC or Horowhenua, or Kapiti. By combining with any of these entities MDC residents would be paying for the massive under-spending by other councils by rates that would be diverted to improve other councils substandard water services rather than continuing the momentum that MDC has created with its investment over recent years.

Please share any other feedback you have about water service delivery in the future. As an ex Aucklander I have experienced the inefficencies and expenses of a multi-council water service and have been very impressed with the service and facilities MDC have created from a relatively small rate payer base and believe MDC are best placed to ensure the future water service delivery of their residents.

The options:

Option 01: This option would continue to see Manawatū District Council continuing to manage and delivery the District's water services. This is Council's preferred method.

Please tell us why you selected the above as your preferred option.

Aorangi Marae representatives attended both the Te Kotui Reo and Public Local Water Done Well Presentations co-ordinated by Ngā Tapuae o Mātangi Councillor, Bridget Bell. We support MDC's proposal of Option 1 for the following reasons;

- 1. It ensures that the rates burden on our whānau living within the MDC rohe is not increased, particularly at a time when so many are struggling. That includes whānau who are renting who undoubtedly will have any extra increase in rates passed on to them.
- 2. We are confident that Option 1 will ensure that Ngāti Kauwhata and other iwi within the rohe have a greater opportunity to be consulted with

Please tell us why you did not select the other two options as your preferred option.

- 1. Ratepayers can not afford to be burdened with the debt of other councils
- 2. We believe that the Options 2 and 3 take away the opportunity for local voices to be heard.
- 3. We understand that Option 3 has just one lwi representative despite the number of iwi covered within those districts

Please share any other feedback you have about water service delivery in the future.

Aorangi Marae are grateful that MDC Councillors over the years had the foresight to invest early in our water infrastructure so that we are not left now with the increasing debt that other councils hold (or will hold) in order to meet new standards

Aorangi Marae look forward to continuing to working collaboratively with MDC to protect and rejuvenate our awa

Aorangi Marae appreciated the opportunity to attend presentations made re MDCs proposal

Option 01: This option would continue to see Manawatū District Council continuing to manage and delivery the District's water services. This is Council's preferred method.

Please tell us why you selected the above as your preferred option.

Manawatu District Council has clearly done well in maintaining and upgrading the water infrastructure. They already have long term goals in place for account for growth and where improvements need to be made. Keeping water services with the council also gives more say to the community, and allows the council to plan infrastructure eg. roads and new developments more synergistically.

Please tell us why you did not select the other two options as your preferred option.

The other two options have very little to no benefit with a large increase of price and increased risk of a potential new organisation not prioritising work being done in Manawatu region. Manawatu would end up subsidising another area which hasn't looked after their own infrastructure. From a risk vs reward perspective there is absolutely no reason to go with either option 2 or 3

The options:

Option 01: This option would continue to see Manawatū District Council continuing to manage and delivery the District's water services. This is Council's preferred method.

Please tell us why you selected the above as your preferred option.

MDC have worked gard to provide a good eater system. Joining eith any otger coubcil will result in higher rates for us with no benefit. Other councils would get the benefit of our rates money.

Please tell us why you did not select the other two options as your preferred option. Other councils need to spend wisrly and prioritise the work. MDC rate payers should not be funding this.

Please share any other feedback you have about water service delivery in the future. In Pohangina we dont have piped water system at all but I do in themove we are moving yo in Feilding. Rates are high enough in Feilding and families cant afford any more at this time.

I wish to request that my name and contact details be withheld from general publication by ticking this box. Please note that if you wish to speak to your submission at the hearing, your name (but not your contact details) will be published within the Council Agenda.

Newspaper Social Media Other

The options:

Option 01: This option would continue to see Manawatū District Council continuing to manage and delivery the District's water services. This is Council's preferred method.

Please tell us why you selected the above as your preferred option.

This appears to be the best option to protect our water services from corporatisation and potentially privatisation. Even though Government says that water services will not be privatised, given their serious interest in privatisation generally, it is hard to trust this. If it weren't for this, I would have preferred the 'group of four' option.

Please tell us why you did not select the other two options as your preferred option.

Aside from the issue of protection from corporatisation, I would have preferred the group of 4 option. As the updated harmonisation modelling included an option that would not financially disadvantage us, it is unreasonable of MDC to suggest that Option 1 would be cheaper to ratepayers. I wonder, was this updating done after you made your decision on 19th December? In the public meeting I attended MDC stated that even though a combined option wouldn't necessarily cost rate-payers more, it would still opt for 'going-it-alone' as they didn't see any benefits to our rate-payers of the 'group of four' this model. I find it hard to believe there are absolutely no benefits, and even if there weren't enough to outweigh MDC's views of the disadvantages, it would have been helpful to have these spelled out.

Was the consultation document also prepared before the updated report? This would explain why the other harmonisation options weren't mentioned – or was it just considered easier to not stir up public interest in these options?

I would have found it helpful to hear Councillors discussion on this issue. Is there any reason why the recording of their meeting on 19th December wasn't put up on the website? I looked at the 7 November video but this was still at the point of considering a full regional model so wasn't particularly relevant and I only watched the beginning of it.

With regard to control, I believe there could be advantages in having a controlling organisation chosen for the necessary skill set. I also think that having more than one Council involved could reduce the risk of tunnel vision or making decisions with insufficient research. I am very mindful that M.D.C. was seduced by slick salesmanship and scientific sounding green-washing to the point of making a deal with Bioplant to lease land to set up an Incineration plant here. What checks and balances have been put in place, as a result of this experience, to ensure that this couldn't happen to us again. If some-one proposing a 'best thing since sliced bread' solution to any of the issues related to running our water services well, nicely dressed up in scientific-sounding green-washing, knocked on MDC's door, what processes are in place to ensure that we don't pursue such 'false solutions'?

I think the advantage of a CCO to borrow more money could be a good safe-guard in the

event of climate-change related catastrophic weather events. I do believe that these are 'when' scenarios, not 'if'. I take MDC's point that under normal circumstances there is no advantage in setting up a CCO for the 'go-it-alone' option, but our ability to cope with upcoming weather events worries me. We are fooling ourselves if we think Cyclone Gabriel type events are 'the new normal'. MDC presumably believes we can cope with an event like this, but even if every country was able to dramatically reduce their greenhouse gases overnight, which is obviously not going to happen, we would still be on a rising trajectory of planetary overheating for some time, with increasingly severe weather events predicted. So the likes of Cyclone Gabriel is not the new normal. The new normal is increasingly severe and increasingly frequent events.

I have a preference for co-operative arrangements that involve working with others, even if they are in a worse position than us. Any one of our Feilding residents may, in the future, move to Palmerston North or Horowhenua or Kapiti (or anywhere else in the country). In that future scenario, we may wish that we had been better neighbours.

I am concerned about the lack of detail about Iwi involvement. I am aware that this is a Central Government issue not a local body one, but want to register my concern here anyway. Because of the general direction of the Coalition government's attitude towards Te Tiriti, I have a sense of forboding about the possibility of little or no Iwi involvement.

Please share any other feedback you have about water service delivery in the future.

This isn't about water service delivery but about public engagement. I am aware of a lot of Facebook Posts on MDC's Facebook, and items in the MDC column in the Feilding Herald, but that's about it. The fact that only a dozen or so people attended the Feilding Library consultation meeting is an indication that something isn't working around engagement. I understand there were similarly small number at the rural village meetings. The meeting that Cr Bridget Bell hosted at the library, on the other hand, had a much higher attendance and much more penetrating questions. That felt more like democracy in action.

I wish to request that my name and contact details be withheld from general publication by ticking this box. Please note that if you wish to speak to your submission at the hearing, your name (but not your contact details) will be published within the Council Agenda.

There has been a submission of the form Local Water Done Well through your Make your mark Manawatū website.

First and Last Name:

Karyn Crawley

Mobile:

0272311554

Email:

karyn@karetu.co.nz

Postal Address:

779 Mount Stewart Halcombe Road

RD9

Feilding 4779

Age Group:

40-59

Are you submitting on behalf of an organisation?

No

Are you an MDC trade waste and/or commercial water customer?

No

My property has:

None of the above

Would you like to come to a hearing and speak to Elected Members about your submission?

No

How did you hear about this Consultation?

Other

The options:

Option 01: This option would continue to see Manawatū District Council continuing to manage and delivery the District's water services. This is Council's preferred method.

Please tell us why you selected the above as your preferred option.

Option one is fiscally the best option for the Manawatu ratepayer. It also allows the ratepayer to have a closer relationship with the decision makers and implementation teams when there are issues to discuss - good or bad. A CCO adds an unnecessary additional layer of bureaucracy.

Please tell us why you did not select the other two options as your preferred option.

No appetite for the rural ratepayers to be landed with rates increases due to higher stranded overheads that would arise from either option two or three.

Please share any other feedback you have about water service delivery in the future. Consideration around how stormwater is managed in urban areas. Greater use od swales for example.

The options:

Option 01: This option would continue to see Manawatū District Council continuing to manage and delivery the District's water services. This is Council's preferred method.

Please tell us why you selected the above as your preferred option.

Having previously worked for council in this area I am aware that MDC has the people and the resources to effectively manage three waters alone.

Please tell us why you did not select the other two options as your preferred option.

I believe that management of local resources should be managed by our council, and I don't think believe there is value in amalgamation of this management with other councils

I wish to request that my name and contact details be withheld from general publication by ticking this box. Please note that if you wish to speak to your submission at the hearing, your name (but not your contact details) will be published within the Council Agenda.

The options:

Option 01: This option would continue to see Manawatū District Council continuing to manage and delivery the District's water services. This is Council's preferred method.

Please tell us why you selected the above as your preferred option.

It's been clearly explained that the investment already put into infrastructure over the years has our District at a stage where it's maintenance and upgrades to meet growth demands, rather than needing large investment into bringing waters up to meeting the required standards.

Please tell us why you did not select the other two options as your preferred option.

Palmerston North?? I don't think so!! There will be minimul funding left for small villages after trying to fix PNCC's problems.

My understanding is a larger collaboration between multiple councils would lead to greater borrowing powers. Which also leads to a greater debt to be serviced. Although this would be spread over a much larger ratepayer catchment, the investments required by other councils would place a bigger burden on Manawatu ratepayers and there's no guarantee that any investing would be within our district.

Please share any other feedback you have about water service delivery in the future.

District planning is looking at Himatangi Beach as a growth area but I don't see any bigger picture plans for stormwater within the village. There's one particular problem area that's being looked at currently, but there are several problems within the village and no future village plan to address these. The new development of Sandown seems to have exacerbated the stormwater issues within the "downstream" village.

At least if water services stay within the Manawatu our village voices might be heard a bit more clearly.

The options:

Option 01: This option would continue to see Manawatū District Council continuing to manage and delivery the District's water services. This is Council's preferred method.

Please tell us why you selected the above as your preferred option.

We have invested well in our 3 waters over the last 3 decades - with more work to do. I feel we are now in the position to reap the benefits from our investments.

Please tell us why you did not select the other two options as your preferred option.

Costs - we have already been paying more for our 3 waters as we had invested in these. I don't feel we should be paying more again to assist other councils that have not invested and planned these important infrastructure projects

I wish to request that my name and contact details be withheld from general publication by ticking this box. Please note that if you wish to speak to your submission at the hearing, your name (but not your contact details) will be published within the Council Agenda.

Local Water Done Well for Manawatū District

8. The options: Please select your preferred option (select one option only).

Council's Preferred Option

Option 01 Status quo with changes

This option would see Manawatū District Council continuing to manage and deliver the District's water services. This is Council's preferred method.

My choice is option 01

Option 02 'The Two'

A multi-council Water Services Council Controlled Organisation jointly owned by Manawatū District Council and Palmerston North City Council for the delivery of water services across both Councils.

My choice is option 02

Option 03 'The Four'

A Water Services Council
Controlled Organisation
jointly owned by
Horowhenua District Council,
Kāpiti Coast District Council,
Palmerston North City
Council, Manawatū District
Council for the delivery
of water services across
all Councils.

My choice is option 03

9. Please tell us why you selected the above as your preferred option?

I am a representative on the Te Kothi Reo Tournata committee for Ngati Peremahawaha Marge, I am also the chair person for the Ngati Parewahawaha Memorial Meeting House Marae Committee, Council representatives gave a presentation to the Kotui Res Tannata committee on 27.3.25 and a further presentation to the wider haption 64.25. Presenters outlined the options in detail including the cost implications. This gave us the appointmenty to ask questions about the three options. There was a lot of information to digect. While we understand council does have some challenger moving forward (eg Stermwater) it was pleasing to hear that there are plans to address this. It was also good to hear how the current systems are performing and that Council has plans is place to significantly reduce water discharge to our natural water ways. We also liked the updates regarding Ohisken NZDF and their connection to the wastewater system which will help to protect the Rangitikei river. Presenters gave us confidence that Council had understolen extensive due dilligence regarding all appoins. For MIC rate payers option I makes the most financit sense. Rate payers will retain the benefit of there previous indestment in 3 maters. While this proposal does not ignore the formation of a cco we are confident in and hap will still have & voice are Submission form - Page 2 valueble contribution to make into the future.

Have your say on

Local Water Done Well for Manawatū District

10. Please tell us why you did not select the other two options as your preferred option?
The main reason for us not selection option 2 or 3 is financial. We do
see some advantages to the establishment of (00% to provide winter
protection to some sections of our community, for example invitor we also
considered the wider impact of a wide scale event (food), systems failure,
environmental event) and if that provided greater resiliance, due to being
part of a larger system. We also questioned the potential to part
aside the costs in the enalysis to see if therewere potential environ-
mental advantages long form by joining across councils. There did not
seem to be any indepth consideration of this but we are interested in
long term outcomes that protect and preserve out waterways.
We were briefed on the harmonisation effects of the proposals. Based
on the information provided MDC rate pagers would be significantly
dizadvantaged by options 2 and 3.
11. Please share any other feedback you have about water service delivery in the future.
11. Please share any other feedback you have about water service delivery in the future. We hope that council will look to extend the rural water scheme to support those communities. In particular we note water supply to the various marge farms and homes in the Te Reu Rey valley and

The options:

Option 01: This option would continue to see Manawatū District Council continuing to manage and delivery the District's water services. This is Council's preferred method.

Please tell us why you selected the above as your preferred option.

MDC are doing our local water exceptionally well, and if we join with the likes of Palmerston North, your rate payers will pay big time for it. Please do not join with any other Council.

Please tell us why you did not select the other two options as your preferred option. Option one is the only simple, practical and common sense decision.

Newspaper

The options:

Option 01: This option would continue to see Manawatū District Council continuing to manage and delivery the District's water services. This is Council's preferred method.

Please tell us why you selected the above as your preferred option.

Local governance for Manawatu area keeps us independent in our own community, to better manage our local water supply and control of stormwater and wastewater. I would think financially a better option too.

Please tell us why you did not select the other two options as your preferred option.

Larger population base would affect water supplies and disposal at a greater cost and councils needing to work in together in only some areas of their responsibilities.

Option 01: This option would continue to see Manawatū District Council continuing to manage and delivery the District's water services. This is Council's preferred method.

Please tell us why you selected the above as your preferred option.

The other models do not make sense from a cost or quality perspective for the Community supported by the MDC

Please tell us why you did not select the other two options as your preferred option. They would not meet the needs of MDC's community and would increase rates significantly

Please share any other feedback you have about water service delivery in the future. Good quality water is so critical to life and health that we need to preserve ease of access and affordability very carefully

I wish to request that my name and contact details be withheld from general publication by ticking this box. Please note that if you wish to speak to your submission at the hearing, your name (but not your contact details) will be published within the Council Agenda.

MDC Website

The options:

Option 01: This option would continue to see Manawatū District Council continuing to manage and delivery the District's water services. This is Council's preferred method.

Please tell us why you selected the above as your preferred option.

Why change something that's working well Happy with current service

Please tell us why you did not select the other two options as your preferred option.

We have paid for our services to be efficient but other councils have spent rates in different areas.

Eg the waste water System Himatangi residents paid extra rates for (along with a bulk \$ amount) to ensure waste water in the village is dealt with effectively.

Would you like to come to a hearing and speak to Elected Members about your submission? Yes

Other

The options:

Option 01: This option would continue to see Manawatū District Council continuing to manage and delivery the District's water services. This is Council's preferred method.

Please tell us why you selected the above as your preferred option.

I attended the hui at the library 7 April. Was satisfied with the MDC response to the submission, in continuing to manage and deliver the District's water services and agree with the Council's preffered method OPTION 01.

Please tell us why you did not select the other two options as your preferred option.

I believe that MDC can deliver and will continue to deliver the best water services for it's communities and rate payers.

I do not believe there was enough investigation process and consultation for options 02 & 03 to deliver better services to MDC and it's all it's Rate payers.

Please share any other feedback you have about water service delivery in the future.

It would be good to know that the water services MDC supply include clean water supplies, e.g sometimes my water has been murky? I understand when it rains or floods the water can be like this, maybe check the infrastructure of all the pipes, that they are up to date and are able to handle the the volumes of water that these pipes have to carry. Also I do not agree for treated sewage to be released to rivers or the sea. It should be discharged into soil without causing significant harm, to monitor the quality to ensure it does not contaminate or cause harm to acquatic life and human health. Totally agree with the ongoing restoration of our wetlands and encouraging better water services to wetlands which are the vessels to a better environmental solutions. I'm worried that option 01 is going to cost us rate payers a lot more in the future. But then again no pain, no gain!

I wish to request that my name and contact details be withheld from general publication by ticking this box. Please note that if you wish to speak to your submission at the hearing, your name (but not your contact details) will be published within the Council Agenda.

Are you submitting on behalf of an organisation? Yes
Name of Organisation Kauwhata Marae
Are you an MDC trade waste and/or commercial water customer? No
My property has: None of the above
Would you like to come to a hearing and speak to Elected Members about your submission?

Other

The options:

Option 01: This option would continue to see Manawatū District Council continuing to manage and delivery the District's water services. This is Council's preferred method.

Please tell us why you selected the above as your preferred option.

- 1. Our whānau in town would not be in a position to financially afford options 2 or 3.
- 2. Kauwhata marae is not on water town supply or wastewater so while this doesn't affect us we do worry about the wider implications for our beneficiaries.

Please tell us why you did not select the other two options as your preferred option.

As above

Please share any other feedback you have about water service delivery in the future.

We have appreciated the ongoing engagement with the marae and the various workshops that were held to inform us on each of the options, this was very beneficial for our iwi whānau.

I wish to request that my name and contact details be withheld from general publication by ticking this box. Please note that if you wish to speak to your submission at the hearing, your name (but not your contact details) will be published within the Council Agenda.

The options:

Option 01: This option would continue to see Manawatū District Council continuing to manage and delivery the District's water services. This is Council's preferred method.

Please tell us why you selected the above as your preferred option.

I do not agree with joining other councils. I do no know the condition of their infrastructure or future needs or their debt levels (now or future). I do not agree with handing our infrastructure over to another entity. The entity will need a whole set up with offices, staff, resources and I fear the blow out costs of this. And we, the rate payers, will end up paying for it. Furthermore, we lose control of our own infrastructure. I don't like that. Our community will be in the hands of someone else. Manawatu does a good job at managing ourselves and it needs to stay this way.

Please tell us why you did not select the other two options as your preferred option.

Refer above.

I wish to request that my name and contact details be withheld from general publication by ticking this box. Please note that if you wish to speak to your submission at the hearing, your name (but not your contact details) will be published within the Council Agenda.

How did you hear about this Consultation?

Newspaper

Word of Mouth

The options:

Option 01: This option would continue to see Manawatū District Council continuing to manage and delivery the District's water services. This is Council's preferred method.

Please tell us why you selected the above as your preferred option.

I selected Option 1 for a number of reasons:

- 1) As there is only 1 Local Council involved (i.e., MDC), financial and managerial governance will be a lot easier.
- 2) Local ratepayer voices would be more likely to be heard.
- 3) Only local iwi would need to be involved.
- 4) Based on projected modelling costings (based on Annual cost per Connected Household) as Graphed in Fig. 1 (Manawatu & PNorth CCO Compared with Base Scenarios), furthermore.

Option 1 is the cheapest Option for the period ranging from 2027/28 to 2051/52.

Please tell us why you did not select the other two options as your preferred option.

I did not select Options 2 & 3 for a number of reasons:

- 1) As there would be many Local Councils involved (i.e. Option 2 has 2, Option 3 has 4), financial and managerial governance will be a lot more difficult, since a cumbersome since a Multi-Council Water Services CCO would need to be set up
- 2) Local ratepayer voices would be less likely to be heard due to other Councils involved.
- 3) Many iwi groups would need to be involved; this would be more likely to be harder to organise.
- 4) Based on projected modelling costings (based on Annual cost per Connected Household) as Graphed in Fig. 1 (Manawatu & PNorth CCO Compared with Base Scenarios),

Option 2 would be the dearest, while Option 3 is in-between Option 1 and 2.

These costings are based on the period ranging from 2027/28 to 2051/52.

Please share any other feedback you have about water service delivery in the future.

Please keep up the maintenance and replacement of old pipes. Old pipes may impart odouriferous VOCs and off-flavours and the like.

Also, there needs to be adequate Surge Valves (SVs) installed to maintain adequate waterquality.

Since our property is at the end of the pipeline, we used to have water-quality issues. This was before there an SV installed in our street. Now, an MDC Contractor regularly opens the SV, and now we have no issues of water quality. I reckon that the regular flushing of the SV clears out all the odouriferous gunk that has built built-up in the end of the pipeline.

Moving forward, can this proceedure be applied across the new subdivisions, Maewa etc., ...

I wish to request that my name and contact details be withheld from general publication by ticking this box. Please note that if you wish to speak to your submission at the hearing, your name (but not your contact details) will be published within the Council Agenda.

How did you hear about this Consultation?

Social Media

The options:

Option 01: This option would continue to see Manawatū District Council continuing to manage and delivery the District's water services. This is Council's preferred method.

Please tell us why you selected the above as your preferred option.

MDC has successfully planned for the future with its investment in water and wastewater treatment.

Please tell us why you did not select the other two options as your preferred option.

Don't see why MDC ratepayers should subsidize other area ratepayers

Would you like to come to a hearing and speak to Elected Members about your submission? Yes

Word of Mouth Other

The options:

Option 03: A multi-council Water Services Council Controlled Organisation jointly owned by Horowhenua District Council, Palmerston North City Council, Manawatū District Council for the delivery of water services across all Councils.

Please tell us why you selected the above as your preferred option.

I selected this option because I believe that whatever council and iwi collective has a mandated authourity over the mouth of the Manawatu River has the power to determine the quality of the water exiting into the ocean and can push back on the feeder civic authourities to ensure the highest quality of water entering the Manawatu River, and it tributaries...which includes PNCC and MDC and TDC. Therefore, if the MDC is in that same room as them they and associated iwi are in a better position to determine outcomes.

Please tell us why you did not select the other two options as your preferred option. I was all in favour of Option 1 until I attended the 2nd presentation given to iwi on Monday 7th April at Te Ahuru Mowai. It was at that meeting that it dawned on me that we are at the

mercy of HDC despite the financials - which are an important factor - but the power of long term outcomes are in HDC hands and the respective iwi in their catchment domain.

Please share any other feedback you have about water service delivery in the future. I believe it is important to think collectively in this regard. I also am afraid that MDC might be shooting itself in the foot (so to speak) if they are too insular in their thinking and perhaps deny themselves the advantage of working with expertise that may be accessed by other civic authourities in PNCC. HDC & KDC.

I wish to request that my name and contact details be withheld from general publication by ticking this box. Please note that if you wish to speak to your submission at the hearing, your name (but not your contact details) will be published within the Council Agenda.

No

Word of Mouth

The options:

Option 01: This option would continue to see Manawatū District Council continuing to manage and delivery the District's water services. This is Council's preferred method.

Please tell us why you selected the above as your preferred option.

MDC invested early into the water infrastructure in our rohe. As a result we have less debt than the other councils that are wanting us to join them. I would not want to see us as ratepayers having our rates increased for the next 30 years to pay the debt of other councils Also, I believe our iwi can have more of a say if MDC remains apart from the other councils

Please tell us why you did not select the other two options as your preferred option.

The reasons are as above;

- 1 I dont want my rates to increase to pay other councils debt
- 2. The size of the proposed areas in Option 2 and 3 is alot larger than MDC rohe and I think the local voice including iwi would be lost if we went with those options

The options:

Option 01: This option would continue to see Manawatū District Council continuing to manage and delivery the District's water services. This is Council's preferred method.

Please tell us why you selected the above as your preferred option.

It is the best option for the district considering their strategic investment in water infrastructure over the last 15 years. Why should MDC residents pay for other councils poor planning.

Please tell us why you did not select the other two options as your preferred option.

They are Poot options for MDC residents, given the extra rates they will have to pay for years to come.

Other

The options:

Option 01: This option would continue to see Manawatū District Council continuing to manage and delivery the District's water services. This is Council's preferred method.

Please tell us why you selected the above as your preferred option.

Option 1 will be the most financially affordable for our whānau and community for the next 30 years

Te Kōtui Reo want to mihi to the councillors 5 terms ago that made the decision to invest in three waters early. That foresight was mokopuna decisions. We look forward to our rates reflecting this early investment in the hope that Feilding will no longer be one of the highest urban rates in the country

Please tell us why you did not select the other two options as your preferred option.

The rise in rates (water levies) will be higher and unaffordable for our whānau

Please share any other feedback you have about water service delivery in the future.

Even though Te Kōtui Reo support the council preferred option with status quo (Option 1), we also want to reaffirm our position of a partnership on water services including future rural water schemes, flood mitigation governance groups etc. It is imperative that an iwi voice is layered from the top with decision-making to the operational execution of the water projects and services. We also recognise and support the rangatiratanga of mandated groups including Te Reureu Te Komanawa (water scheme) and Mana whakahaere (Oroua governance group with Ngāti Kauwhata). We give acknowledgement to both entities and their relationships with council and the trust and mandate given by their respective marae and hapū.

How did you hear about this Consultation?

Other

The options:

Option 01: This option would continue to see Manawatū District Council continuing to manage and delivery the District's water services. This is Council's preferred method.

Please tell us why you selected the above as your preferred option.

The Modelling shown by the Council shows the Stand Alone Option being the best option Financially. Credit to MDC for having the Vision and Commitment to have already rolled out the Upgraded Water Services when other Councils have sat on their hands and diverted funds to non Essential Projects. Great to see the Success of this and the ability to manage the Project within the Council Organisation. You've proven you can do it. To go into any other arrangement with Multiple Councils who are less prepared would be detrimental to the MDC region as it would inevitably ending up subsidising the others in terms of Resource as well as Financially.

Please tell us why you did not select the other two options as your preferred option.

I feel it would be detrimental from a Financial and Resource Allocation point of view. Going into a joint Organisation with other Councils who are further behind in their Water Management will only add more Costs and Management of another CCO with less autonomy, flexibility and agility for MDC to manage it's own Projects. I think as MDC have already rolled out their project they have already got a very good measure of the Costs and Logistics involved and are much more of a Known Quantity. Other Councils that may be involved in a CCO are at a much earlier stage with their Water Projects and many of the Costs and Logistical Challenges are Relatively Unknown and UnQuantified. I don't see many, if any benefits of going into a joint CCO for MDC and it's Ratepayers, only additional Costs and Bureaucracy.

Please share any other feedback you have about water service delivery in the future.

I think MDC have created a great Platform in Water Services to build from going forward. The Foresight has put our Council and Ratepayers well ahead than most other Councils regarding Local Water Done Well and are well positioned to Enhance and Develop this Infrastructure going Forward as the Region Requires . Well done to all involved

MDC Website
Social Media

The options:

Option 01: This option would continue to see Manawatū District Council continuing to manage and delivery the District's water services. This is Council's preferred method.

Please tell us why you selected the above as your preferred option.

I believe that MDC does a great job of managing the water services in Feilding (but you could say that I am biased as a former Water Services Asset Manager). Water services are approximately one third of council activities in terms of budgets and are closely linked to roading and planning. Any strategic management/development of the district needs to consider all council activities as a whole and consider the welfare of the district and its people within that consideration.

I believe that most individual councils across NZ do a better job than any of the large CCO's who supply water services.

Please tell us why you did not select the other two options as your preferred option.

I would not want another entity set up that would spend a lot of time and money on amalgamating water services across 2 or 4 councils, changing software, control, asset management and financial systems just so it can gain "economies of scale" (a misnomer if ever i heard one). I believe that staff who are transferred to CCO's can feel as though they are second class council employees - no longer serving the communities where they live but still responsible for anything bad that happens.

Forming separate entities can encourage CCO's to farm out the management and eventually the whole operation to private companies that may fold and leave communities without proper water services.

CCO's covering several rural councils may prefer to centralise meaning fewer engineers in the local area and fewer engineers to call on in an emergency or help manage or advise on local risks.

Please share any other feedback you have about water service delivery in the future.

I fully support water services remaining directly controlled by the council, or in the case of rural supplies, by the individual communities served. This gives direct accountability and means that water is managed by people that care.

9. Please tell us why you selected the above as your preferred option?

worter sevices in the lost 15 years. Incremental development, speculing the cost over several financial years and minimistry debt is the best long-term option for MDC.

Retaining management of water services in house also decreases duptication of management teams and better altigns water services with MDC strategic planning.

As a worter services acctonier, retaining services in howe of more makes the council a one-stop shop - it is.
responsible for all building, planning & water services
results within it's boundaries. This makes for better.

	PMCC water services need major expenditure to
	upgrade to meet appropriate standards. Also, 7+ 78
	unclear how much of their eurrent long-term delst pucc
	seek to transfer to the new water services entity.
	Under both options 2 & 3 Price will be the major.
	beneficiary. Possible Pacc should be asked to bring
	their worstewater and stormwater services up to stordard,
	and pay down much of the resultant borrogong
	before being apported for members top of any
	regional water services entry so that all members
	regional water services entry so that all members are on a level pleying field at maption.
	11. Please share any other feedback you have about water service delivery in the future.
1 ?	Metering is high eapital cost, manual reading has high
	operational costs, and the technology for real-time automate
	consumer metering is not fully mature compared with
	The almost absquittous use in electrical supply networks.
	I suggest more use of real-time meterico in the network
	for network management and leak eletection, with
	eventual roll-out to consumer metering once regi-time,
	I suggest more use of real-time metering in the network for network management and leak eletection, with eventual roll-out to consumer metering once real-time, metering is a mature technology.
2,	
	supply households along the pripetine network outside of
	supply households along the pipeline network outside of the Feilding urban network. Mole-ploughing small diameter
	some that deliver a fored value wer day to a concumere tout
	is a good way of delivering better quality water than most ronnwater tank systems. Should be part at long-term strategy
	romwater tank systems. Should be part at long-term strategy
